

## Axially split volute casing pumps

Omega

Omega V

### Automation products available:

- PumpExpert
- Hyamaster
- hyatronic

## Applications

Waterworks, irrigation and drainage pumping stations, power stations, industrial water supply systems, fire fighting systems, marine applications as well as general applications in refineries.

## Operating data

Pump sizes	DN 80 up to 350	(3...14 in)
Capacities	Q up to 800 l/s	(12.328 US.gpm)
Total heads	H up to 170 m	(558 ft)
Operating pressure	p up to 25 bar	(363 psi)
Operating temperature	t up to +105 °C	(221 °C)

## Design

Single stage, axially split volute casing pump with double-entry radial impeller, for horizontal or vertical installation. Installation of the horizontal drive either on the left or right side of the pump (optional). Flanges drilled to ISO, DIN, BS or ANSI.

## Designation

## Bearings

**Omega:** on both sides grease-lubricated, maintenance-free, deep groove ball bearings, sealed for life,

**Omega V:** top: grease-lubricated, maintenance-free, deep groove ball bearing, sealed for life  
bottom: wear-resistant, medium-lubricated plain bearing of silicon carbide (Residur<sup>®</sup>).

## Shaft seal

Uncooled soft-packed stuffing box or uncooled, single-acting, unbalanced bi-directional mechanical seal acc. to DIN 24960.

With an operating pressure > 16 bar: mechanical seal, balanced by hydraulic means.

## Materials

Volute casing:	Cast iron	JL 1040 (GG-25)
	Ductile cast iron	JS 1030 (GGG-40)
	Ni-Resist	GGG-NiCrNb 202
	Duplex steel	1.4517 / 1.4593
Impeller:	Bronze	G-CuSn10
	Duplex steel	1.4517 / 1.4593
Shaft:	Chromium steel	1.4021
	Duplex steel	1.4462
Casing wear rings:	Bronze	GZ-CuSn7ZnPb
	Duplex steel	1.4470

**Selection charts**

(higher speeds, with the pumps driven by a Diesel unit, available upon request)

**n = 2900 1/min**     $\sqcap$  =  $\eta_{opt}$  A - Impeller  
                               + =  $\eta_{opt}$  B - Impeller

**n = 1450 1/min**     $\sqcap$  =  $\eta_{opt}$  A - Impeller  
                               + =  $\eta_{opt}$  B - Impeller  
                               ○ =  $\eta_{opt}$  C - Impeller

<sup>1)</sup> - Impeller of JL 1040 not permitted

JL 1040 → GG-25

**Your technical advantages**

**Your service advantages**

**Innovative casing**

- in-line design
- short distance between bearings and correspondingly short shaft
- leak-tight due to compact joint flange with long, prestressed bolts
- counter-rotation possible with the same parts
- double-volute version for appropriate total heads
- upper casing self-aligning and, therefore, easy to mount

**High-performance impeller**

- minimal axial thrust due to double-entry impeller
- impeller wear rings optional
- new vane passage with excellent hydraulic characteristics

**Service-friendly shaft**

- completely sealed and dry for zero corrosion
- short and rigid with negligible vibrations
- replaceable shaft protecting sleeves
- no threads exposed to pumped medium, i.e. long operating life and no corrosion
- adjustment-free assembly
- quick and easy assembly/dismantling of the rotor components due to elastically prestressed mountings

**Excellent efficiencies**

**Outstanding NPSH**

- computer-optimized double-entry impellers
- smooth surfaces inside the casing and on the impeller
- smooth, quiet running also guaranteed by a large impeller eye area
- no drop in efficiency due to cost-effective, replaceable casing wear rings and impeller wear rings
- smooth, low-wear running due to a swirl-free, low-energy loss inlet

**Long-life bearings**

- covered, sealed for life, grease-lubricated antifriction bearings for a long service life
- open gland, i.e. enough space for service activities

**Application-orientated seals**

- asbestos-free, potable-water quality soft-packed stuffing boxes
- or bi-directional mechanical seals

## Scope of supply

Pump supplied with bare shaft end, in horizontal or vertical design, painted to KSB standard, sealed by a soft-packed stuffing box or by a mechanical seal.

Add-on components to convert the pump to a complete pump / motor set:

Pump to be supplied with:

- common baseplate / base frame for pump and motor (for horizontal installation)
- motor stool and foot for vertical installation (including support feet in case of the larger motor sizes)
- motor
- coupling and coupling guard

Accessories:

- sealing water and / or flush pipe
- complete set of pressure gauges
- cyclone separator including the necessary piping
- vent valve (for manual or automatic operation)
- temperature sensor for anti-friction bearings (PT 100)
- limit value sensor switch for PT 100

## Packing and shipment

### Omega horizontal:

Up to a total weight of 1500 kg or a motor size IEC 280, the units (consisting of pump, motor, coupling and coupling guard) are supplied completely assembled and mounted on a common baseplate / common base frame. Units weighing > 1500 kg, or comprising a motor size IEC 315 and larger are completely assembled at the factory to check the components for correct adjustment, subsequently disassembled again and each major component is packed separately for shipment.

### Omega V vertical:

Omega V vertical pumps are dispatched with the motor stool mounted. The motors themselves are packed separately.

## Guarantee, testing and quality control

Every pump is tested for correct functioning. The operating data are guaranteed **without** acceptance test in accordance with ISO 2548 C, DIN 1944/III or comparable international testing standards. Acceptance tests in accordance with ISO / DIN standards can be provided against an extra charge.

The quality of the Omega products is ensured by a tested and certified quality assurance system according to DIN ISO 9001 / EN 29001.

## Order data

### - pump:

- description of the pump according to "Designation"
- capacity Q
- total head H (  $H_{geo}$  and plant losses )
- material combination
- mating dimensions of flanges
- shaft seal soft packed stuffing box or a mechanical seal
- liquid handled and liquid temperature (see fig. pg. 7)
- accessories required
- number of copies and language of operating manual

### - motor:

#### (choice by KSB)

- type of construction
- type of enclosure
- voltage, frequency, method of starting
- ambient temperature
- insulation class
- accessories required

### motor:

(motor to be supplied by the customer)

**Each order has to be accompanied by a binding motor dimension table and a data sheet indicating the effective speed and weight of the motor. This information has to be supplied by the client without exception!**

**Sales program and accessories**

350-430 <sup>2)</sup>	10			10	
350-510 <sup>2)</sup>					

<sup>2)</sup> For material combinations GB and NC the maximum permissible operating pressure is dictated by the flange design according to ANSI B 16.1 Class 125 standard.

**N. B. :** - With a test pressure of  $p > 20$  bar, use a balanced mechanical seal (pressure test)  
- Although the operating pressure and the nominal pressure of the casing flange are not directly related, the nominal pressure of the flange to be used has to be one pressure stage higher than the guaranteed operating pressure.

## Speeds

For speeds in excess of the figures indicated in the sales documentation, please contact KSB indicating the required operating range.

**Speed control: Shaft sealing always by means of a mechanical seal.  
For speed control on Omega V, check-back with KSB.**

## Vibrations

Vibration values of the pump according to DIN ISO 1949, in the operating range from 0.5 up to  $1.2 \times Q_{Opt}$

- Omega :	Group G	$v_{eff} < 4.5 \text{ mm/s}$
- Omega V:	Group T	$v_{eff} < 7.0 \text{ mm/s}$

## Coating

### A ) Standard coating

Surface treatment:	SA 2½ to DIN 55928, Part 4
Corrosion control:	to AA 0080-06-01
Primer:	2-pack zinc-rich primer or 2-pack zinc phosphate

**Top coat : KSB standard**

2-pack epoxy resin, layer thickness approx. 0.10 mm, colour RAL 5002 (ultramarine blue)

### B ) Internal coating - approved for potable water (standard variant for GB-design)

Surface treatment:	SA 2½ to DIN 55928, Part 4
Corrosion control:	to AA 0080-06-01
Primer	2-pack zinc-rich primer or 2-pack zinc phosphate

**Top coat (inside):**

2-pack epoxy resin, layer thickness approx. 0.125 mm, colour RAL 9005 (black)

**Arrangement of sealing water and flush pipes**

**01** Sealing water pipe for gland packing

**02** Flush pipe for mechanical seal

**03** Sealing water pipe for gland packing  
Flush pipe for Residur® bearing

**04** Flush pipe for mechanical seal  
Flush pipe for Residur® bearing

**Arrangement of venting connections and bearing temperature sensor** (vent valves are available as accessories)

**05** Vent valve

**06** Sealing water pipe for gland packing

## General arrangement drawing Omega 80 - 210 up to 100 - 375

### Type of arrangement 3E

Direction of rotation: CLOCKWISE

**Connections:**

- 1M Pressure gauge G 1/2
- 5D Vent G 1/2
- 6B Drainage G 1/2
- 8B Leakage liquid drain G 3/4

Grout baseplate / base frame with non-shrinking cement.  
Position of the terminal box, see "Motor dimension sheet".

The motor-dependent dimensions refer to KSB standard motors (see table "Motor dimensions and weights").

### Major external pump dimensions and weights

Mating flange  
All flanges designed as  
plate flanges

**N.B.**

- The numbers listed in the table indicate the relevant base plate numbers.
  - The baseplate numbers shown in the boxes also serve to select the correct motor size for the listed pump size.
  - Units comprising a motor size 315 and larger are completely assembled for verification and adjustment of the individual components.
- Before shipment, the units are dismantled again and the components packed / shipped separately.

## Spare parts

1. Recommended for spare parts for **commissioning**
2. Recommended for spare parts for **2-years operation** (8000 hours per year)
3. Recommended for spare parts for **5-years operation** (8000 hours per year)

### 1. Proposals for spare parts for **commissioning**

Part no.	Part designation	Number of pumps including stand-by pumps							
		1	2	3	4	5	6	8	10 and more
		Number of spare parts							
321 550.1/2 520	Set Deep groove ball bearings Washers Sleeve	1	1	1	2	2	3	4	5
411.1 412.1-6 421.1/2	Set V-Rings O-Rings Radial shaft seal ring	1	2	3	4	5	6	8	10

### for the mechanical seal-fitted pump

Part no.	Part designation	Number of pumps including stand-by pumps							
		1	2	3	4	5	6	8	10 and more
		Number of spare parts							
433	Set Mechanical seals	1	1	1	2	2	3	4	5

### for the gland-fitted pump

Part no.	Part designation	Number of pumps including stand-by pumps							
		1	2	3	4	5	6	8	10 and more
		Number of spare parts							
461	Gland packing (Set packing rings)	1	2	3	4	5	6	8	10

## Spare parts

2. Recommended for spare parts for **2-years operation** (8000 hours per year)

Part no.	Part designation	Number of pumps including stand-by pumps								E = spare part R = replacement part V = wear part
		1	2	3	4	5	6	8	10 and more	
		Number of spare parts								
211 920.3 932 940.1/2/3	Shaft, with Nut Circlip Keys	-	-	-	1	1	1	2	3	E
524.1	Set shaft protec. sleeve	1	1	1	2	2	3	4	5	V
234	Impeller	-	-	-	1	1	1	2	3	E
502	Set of casing wear rings	1	1	1	2	2	3	4	5	V
503	Set of impeller wear rings (if mounted)	1	1	1	2	2	3	4	5	V
321 550.1/2 520	Set consisting of Deep groove ball bearings Washers Sleeve	1	1	1	2	2	3	4	5	R
411.1 412.1-6 421.1/2	Set consisting of V-Rings O-Rings Radial shaft seal rings	1	2	3	4	5	6	8	10	V

### for the mechanical seal-fitted pump

Part no.	Part designation	Number of pumps including stand-by pumps								E = spare part R = replacement part V = wear part
		1	2	3	4	5	6	8	10 and more	
		Number of spare parts								
433	Set of Mechanical seals	1	1	1	2	2	3	4	5	V

### for the gland-fitted pump

Part no.	Part designation	Number of pumps including stand-by pumps								E = spare part R = replacement part V = wear part
		1	2	3	4	5	6	8	10 and more	
		Number of spare parts								
452 455 457 458	Set consisting of Gland Stuffing box insert Neck rings Lantern rings	-	-	-	1	1	1	2	3	R
461	Gland packing (Set packing rings)	4	8	12	16	20	24	32	40	V

### for the vertical design

Part no.	Part designation	Number of pumps including stand-by pumps								E = spare part R = replacement part V = wear part
		1	2	3	4	5	6	8	10 and more	
		Number of spare parts								
524.2 545 350.2	Residur bearing, compl. Shaft protec. sleeve Bearing bush Bearing housing	1	1	1	2	2	3	4	5	V

**Spare parts**

 3. Recommended for spare parts for **5-years operation** (8000 hours per year)

Part no.	Part designation	Number of pumps including stand-by pumps								E = spare part R = replacement part V = wear part
		1	2	3	4	5	6	8	10 and more	
		Number of spare parts								
211 920.3 932 940.1/2/3	Shaft, with Nut Circlip Keys	1	1	1	2	2	2	4	6	E
524.1	Set shaft protec. sleeve	2	2	2	4	4	6	8	10	V
234	Impeller	1	1	1	2	2	2	4	6	E
502	Set of casing wear rings	2	2	2	4	4	6	8	10	V
503	Set of impeller wear rings (if mounted)	2	2	2	4	4	6	8	10	V
321 550.1/2 520	Set consisting of Deep groove ball bearings Washers Sleeve	2	2	2	4	4	6	8	10	R
411.1 412.1-6 421.1/2	Set consisting of V-Rings O-Rings Radial shaft seal rings	2	2	6	8	8	12	16	20	V
